MAKING BRIQUETS

Has Saved 2,750,000 Tons of Coal Waste in Past Ten Years.

During the last 10 years 2,750,000 tons of fuel briquettes have been made in the United States and sold for more than \$14,000,000. The principal raw materials used in this industry are culm from the anthracite mines of Pennsylvania, slack produced by the rehandling of coal shipped by vessel to the head of Lake Superior and culm residue from the manufacture of oil gas. In 1913 12 briquetting plants were in operation in the United States—five in the eastern states, four in the central states and three on the Pacific coast. The output of these plants in 1913, according to the United States Geological Survey, Department of the Interior, was 256,734 short tons valued at \$2,301,054.

A copy of a brief report on fuel briquetting in 1913, by F. C. Tryon, may be obtained free on application to the director of the Geological Survey, Washington, D. C.

WITHDRAWAL OPEN TOP CAR ORDER IS EXPECTED SHORTLY

Cars With 28 Inch Spikes or Higher are To be Withdrawn From Top to General Trade.

The Interstate Commerce Commission is expected to shortly withdraw its order holding open cars with sides 28 inches or higher to the coast carrying trade. With the suspension of the Northwest coast priority order, the fuel needs of the lower lake regions are being adequately met, and the best opinion here is that the commission will lift this open top car order shortly. The rapidly with which the lower lake regions are fueled and the weather will largely determine the exact date. The open top car order is the last of the commission's service orders in effect. The New England, Northwest and utility priorities now being but memories—but bitter ones.

No letup is apparent in railroad traffic despite the persistence of reports that freight offerings are tapering off. In the week ended October 16 the railroads loaded 1,005,663 cars of revenue freight, compared with 1,009,787 cars in the week preceding, while the record week boasts of a loading of only 1,011,000 cars. Against the loading of 1,005,663 cars in the week of October 16, the corresponding weeks of 1918 and 1913 can boast of only 972,978 and 327,134 cars respectively. In the week ended October 18 the railroads loaded 227,642 cars of coal, compared with 217,416 cars in the same week of 1919; 34,138 cars of coke, against 34,835 cars last year; and 76,551 cars of ore, against 63,334 cars last year.

ALLEN BOLEN.
SMITHFIELD, Nev., 4.—Allen Bolen, after an illness of several months, died at his home here Tuesday morning, aged 75 years. Mr. Bolen was a veteran of the Civil War, having enlisted at the age of 18 on the 20th day of August, 1862, in Company K, 14th West Virginia Infantry Volunteers. He was discharged May 30, 1865. He was a member of the Baptist church and of Jerry Jones Post No. 541, G. A. R., of Smithfield, which order will conduct the services at the grave today in accordance with the ritual of the G. A. R. Comrade Bolen had received an increase in his pension under the act of May 1, 1920, to \$72-per month only a few days before his death. Comrade S. A. Randall was instrumental in securing prompt action, getting the claim granted in a remarkably short time.

J. H. HOBBS.
J. H. Hobbs, general auditor of the Bell Telephone company of Pennsylvania, died at his home in Philadelphia yesterday, aged 48 years. He was born in New York City. He became a messenger boy at the age of 14 and a telephone operator after three months' practice. He entered the Bell service in New York in 1895, became general bookkeeper six years later. In 1913 he became affiliated with the Bell Telephone Association and was promoted to general auditor a year ago, after 21 years' experience. He was one of the most popular men in the Bell organization and enjoyed a wide acquaintance in the business world.
